

CASE STUDY: TECHMARK, INC.

IT CONSULTING

WORKFLOW

PROBLEM

Techmark, Inc. had several employees using 7 year old PCs. The issues with the antiquated technology was causing a slow or even in some cases, a stalled work pace.

SOLUTION

Sector 7 proposed building, warranting and replacing the existing computers with up-to-date PCs.

PROCESS

7 PCs were to be built, tested and installed on-site at Techmark, Inc on a Friday afternoon/Saturday morning to minimize any downtime. One of our techs was to be on-site Monday morning to make sure there were no issues.

RESULT

Techmark, Inc's employees now have brand new, fast, warrantied PCs that will serve them for the next 5 years.
