CITRIX®

XenMobile: The revolutionary way to mobilize your business

XenMobile is a comprehensive solution to manage mobile apps, data and devices, available both on-premises and in the cloud. Users have single-click access to all of their apps from a unified corporate app store and IT can easily configure, secure and support mobile devices. With XenMobile technology, IT can meet their compliance and control needs while giving users the freedom to experience work and life their way.

Features by edition		XenMobile MDM Edition	XenMobile Advanced Edition	XenMobile Enterprise Edition
Configure, secure, provision and support mobile devices with MDM				
Device management	Manage and configure corporate and bring-your-own (BYO) devices throughout their lifecycle			
	Support every major mobile platform including iOS, Android, BlackBerry, Windows and non-C2DM Android platforms like the Amazon Kindle Fire or Samsung SAFE	·	·	·
Real-time Active Directory integration	Integrate with LDAP in real-time to perform user authentication and to manage group policies			
	Apply policy changes immediately based on LDAP changes	·	·	·
Policy configuration	Manage a comprehensive array of mobile policies based on OS and patch levels, passcodes, device ownership, apps and device resources, platform-specific policies, encryption, device status and location	·	·	·
Security and compliance	Ensure end-to-end security and compliance across device platforms, including rooting and jailbreak detection, pre-enrollment device checks, geo-fencing and tracking, context-aware policies, app blacklist/whitelist and full or selective wipe of devices			
	Initiate automated compliance actions when devices deviate from policy	·	·	·
Scalability and high availability	Ensure scalability through industry-standard HA with active clustering at all tiers	·	·	·
Ease of administration	Centralize administration through a console with customizable dashboard and role-based access and views			
	Configure notifications, receive alerts and easily deploy mobile policies by mixing and matching parameters across groups and users	·	·	·
Provisioning and self-service enrollment	Provide rapid over-the-air provisioning and self-service enrollment with one-time passcodes and server auto-discovery			
	Deploy apps through an enterprise app store as well as app push and removal	·	·	·
Enterprise integration	Seamlessly plug in to existing IT infrastructure including LDAP, Microsoft Exchange, PKI, NAC, VPN, WiFi and SIEM	·	·	·

Features by edition		XenMobile MDM Edition	XenMobile Advanced Edition	XenMobile Enterprise Edition
Monitoring and support	Enable remote support and troubleshooting including VOIP and chat			
	Create reports including unmanaged or rogue devices, compliance reporting, app and device inventory, blocked status and system alerts	•	•	•
Mobile app management with largest ecosystem of apps built for business				
Device decommissioning	Automatically decommission devices if they are lost or based on user status in Active Directory			
	Perform selective or full wipe of devices based on status	•	•	•
Self-service web portal	Allow mobile users to locate, lock or wipe lost/stolen devices without waiting for Help Desk support.	•	•	•
Mobile application management	Deliver any native iOS, Android or HTML5 mobile app to devices with a native user experience		•	•
App security	Use mobile app container technology to separate mobile enterprise apps and data from personal apps			
	50+ MAM policies that do not require device enrollment		•	•
	Secure business apps and data with encryption and mobile DLP technologies			
Control app interactions	Enable seamless communication between XenMobile apps			
	Enforce policies around activities such as cut-and-paste between apps		•	•
App policies	Implement granular policy-based management and access controls over HTML5 and native mobile apps		•	•
MDX SDK	Enable any mobile app with MDX SDK			
	Wrap any iOS or Android app to be imported into XenMobile with no additional development needed		•	•
Sandboxed email, browser and data sharing apps				
Secure Mail	Provide containerized, native mobile email, calendar and contacts app for iOS and Android devices that leverages Citrix MDX technologies for additional security features		•	•
Conference services integration	Enable users to automatically launch and join conference services such as GoToMeeting, Webex and Lync directly from their Secure Mail calendars with Fast Dial and Fast Join		•	•
Business-class workflows for email attachments with Secure Mail	Easily access, sort and save email attachments with the Secure Mail attachment repository. Allow attachments from device photo gallery with simple to use "Attach Last Photo" option.		•	•
Advanced email capabilities	Support HTML emails, Office 365, Lotus Notes, Out-Of-Office (OOO) notifications, S/MIME encryption, and Free/Busy calendar integration		•	•
Information Rights Management (IRM) support	Enable Secure Mail to support exchange Information Rights Management (IRM) capabilities, which allows a sender to prevent recipients from forwarding, modifying, printing, faxing, saving, or cutting and pasting the message content		•	•
Secure Web	Provide a full-featured secure mobile browser that leverages MDX Technologies for additional security, including a micro-VPN for intranet sites and encryption for the browser cache, bookmarks, cookies and history		•	•
	Allow for security functionality including URL blacklisting, whitelisting, and bookmark/homepage push			
Secure Notes	Provide a business-class secure note taking application with email and calendar integration for streamlined mobile workflows			•

Features by edition		XenMobile MDM Edition	XenMobile Advanced Edition	XenMobile Enterprise Edition
Secure Forms	Secure Forms is a mobile app platform that allows non-technical users an easy way of creating, publishing and submitting digital versions of commonly used forms in the workplace			•
